YOUR JOURNEY TO THE NORTH

Spantik Climbing Expedition

Plan a Spantik climbing journey with a paced approach and an expedition support plan matched to your team.

Expedition planning · Schedule tailored to your team, acclimatisation and weather window · 2 traveller(s) · Chogo Lungma region, Baltistan

Trip proposal · Subject to availability · Prepared 28 Oct 2026

Your expedition outline

Discuss your objective

Share your proposed mountain and route, climbing experience, dates and the support you are seeking.

Agree the expedition scope

Review team roles, permits, transport, cargo, base-camp services and any separately requested climbing support.

Prepare and approach

Complete the agreed arrival, equipment checks and approach stages, with acclimatisation built into the tailored programme.

Assess conditions and climb

The expedition leader sets camp moves, rest periods, rotations and any attempt window according to the route, conditions and team readiness.

Return and close the expedition

Complete the descent, camp clearance, waste arrangements and return transport according to the agreed plan.

A detailed itinerary is prepared after reviewing your objective, experience, team and route.

Weather, flight schedules and road conditions may change the route. Your local team will confirm the final arrangements.

Expedition services to discuss

- Approach and return transport planning
- Permit and local access coordination for the agreed route
- Cargo, porterage and base-camp arrangements scoped to your team
- Camp crew, equipment, meals and communications defined in the service proposal

Services requiring a separate agreement

- Services outside the final written agreement
- International travel, personal insurance and rescue costs unless expressly arranged
- High-altitude guides, climbing staff, oxygen and technical equipment unless expressly agreed

Before you travel

Share your climbing CV, recent altitude experience, intended objective, preferred dates and team size. Tell us which guiding, equipment and logistics you already have. The expedition leader reviews the route and schedule before a detailed itinerary is agreed.

Season & preparation

Suggested season: Discuss the operating window for your chosen route

Difficulty: High-altitude glacier mountaineering

Guide & safety arrangements

Climbing leadership, guide qualifications, team experience, permits, communications and emergency arrangements must be established for the specific objective. A discussion does not confirm access or a summit attempt; final decisions depend on mountain conditions and the expedition leader.

Weather & travel changes

Build an expedition window with room for acclimatisation, route assessment, weather and a changed return. The final agreement explains programme changes, unused services and additional logistics.

Let’s make this your journey
